Dear Recruiter,

With the utmost eagerness, I want to express my interest & passion for the Software Engineering Intern position. As an **adaptable** & **Problem-solving** driven employee, I know my versatile skills and qualifications will make me an asset to the team.

As a prospective employee, I immediately can bring the following skills to the team:

Full Stack Developer: Created various applications based on MERN stack. One of them is a Social Networking application which has almost all the functionalities of a social networking website. Made the application secure by using login system based on passport.

Data Science: Published a research paper on EEG brainwave dataset which compared the resulting change in the accuracy of the model on changing various hyperparameters.

While my resume provides a quick summary of my projects, I hope to have the opportunity to share how I can bring value to your company's needs.

Sincerely,

Samaditya Jatar
